Profile

Experienced in React.js, AI, and creative tech. I've contributed to open-source projects like Altair GraphQL, Hoppscotch, and Godot. Three years building banner ads for Publicis and Tribal DDB. Recent work includes a React storefront with Firebase, Stripe, and Three.js. As a Javascript AI trainer for Outlier AI, I curate and train datasets to improve model performance. Skills	Web Developer	Open Source	Computer Graphics
	Built React storefront for a Toronto vendor with Firebase (API backend), React Hook Form (checkout), Stripe (payments), and Three.js (3D product display), including a custom product design tool.	Active open-source contributor with experience using Jest for test coverage and successful PR integration. Strong focus on collaboration, code review, and community-driven development.	Applied advertising and 3D graphics background to motion graphics work in music videos and television, strengthening my eye for visual design and UX in web development. Strong Figma skills.

Experience	E-Commerce Development	2025
	Full-Stack Developer	
	Designed and built a custom React-based online store. Integrated Firebase for backend/API, and Stripe for payments. Used Three.js for interactive 3D product displays and developed a custom tool for users to design personalized items.	
	Outlier AI	2024-2025
	AI Trainer (JavaScript)	
	Evaluate JavaScript-related datasets to train machine learning models for code understanding and analysis. My role includes annotating code snippets, identifying patterns, and creating training scenarios that help improve model performance.	
	Motion Graphics	2016-2024
	Animation & Rigging	
	Worked as a Senior Revisionist at Brown Bag Films, responding to client feedback and collaborating remotely with supervisors. At Corus Entertainment, rigged characters — primarily 2D, with 3D work on Agent Binky.	
	PlusK	2012-2015
	Web Developer	
	Delivered functional banner ads for Publicis and Tribal DDB, transitioning from ActionScript to JavaScript to meet evolving standards. Built reusable, memory-efficient code to enable rapid updates across multiple campaign iterations.	

Education	Seneca College	Humber College
	Computer Programming 2010-2012	3D Graphics 2008-2010
